- Review of content: concise
- ~~Form~~ Presentation of content is good, for a day-to-day expository lesson.
for a review lesson, let the kids do the work.
- Eye contact: good, suggest making eye contact with all members of the class (makes them feel valued).
- Slides are information-rich \Rightarrow good summary however some info was hard to read (too small) \rightarrow fix by providing downloadable version on Edmodo.
- Some students getting chatty during lesson: turn this around by asking them to explain content.
- Getting kids to ~~esp~~ answer Qs \rightarrow good. more of this pls, rather than giving kids the answers (esp in review lesson).
- Focusing on safety with radioisotopes: good.
- Kids using phones: usually have face down, hands in front of them, not listening. Confiscate!
- Circular motion and deflection of α , β particles combined \Rightarrow kids started paying attention.
Good work linking concepts.
